WORK EXPERIENCE

The LEGO Group (2022–Present) | Senior Software Engineer - Denmark
- Smooth transition to a new architecture moving a monolith into microservices, implementing new features without disrupting the existing product.
- Designed and implemented a state machine to solve a complex system problem, ensuring robust and scalable solutions.
- Collaborated closely with stakeholders and internal and external users, ensuring their feedback shaped the product. This approach led to an improvement in user satisfaction.

Siteimprove (2019–2022) | Senior Software Engineer - Denmark
- Ownership of key departmental services, addressing technical debt and implementing critical new functionalities to improve overall system performance.
- Successfully migrated on-premises services to a Kubernetes cluster on AWS, enhancing scalability and reducing infrastructure costs.
- Collaborated with cross-functional teams, helping to bridge the gap between product and engineering to enhance overall efficiency and create a smoother workflow.

Mono Solutions (2017–2019) | Senior Full Stack Developer - Denmark
- Developed a website generator SaaS solution specifically designed for small and medium-sized enterprises, with a key focus on backend technologies, ensuring robust and reliable performance.
- Improved the integration between frontend and backend components, significantly enhancing the user experience and helping clients drive business growth, with a strong focus on web accessibility.

Serious Games Interactive (2016–2017) | Full Stack Developer - Denmark
- Developed educational games for both web and mobile platforms, creating engaging learning experiences that captivated children and inspired collaboration with adults.
- Enhanced educational impact by working closely with Product Managers and Game Designers to refine game concepts and ensure successful implementations.

Olapic (2014–2016) | Backend Engineer - Argentina
- Integrated products and data to create smooth connections and efficient data flow, streamlining the ETL pipeline for better performance.
- Specialized in API development and consumption, enabling seamless service integrations and performing data analysis to boost platform efficiency and effectiveness.
- Led efforts that scaled our system from processing data for a major client, significantly improving their operational capacity.

Gesto (2014–2016) | Senior Software Engineer - Argentina
- Led backend development and DevOps operations at a healthcare startup focused on IVF clinics, laying the groundwork for scalable and reliable systems.
- Engineered RESTful APIs and maintained critical infrastructure, creating the technical backbone that supported the startup's rapid growth.
- Played a pivotal role in driving the startup's success, helping it make a significant impact in the healthcare sector.

Globant (2013–2014) | Web UI Developer - Argentina
- Web development for a financial organization, designing intuitive user interfaces that significantly improved the user experience on a new platform, with a strong focus on mobile devices.

Flexxus SA (2009–2014) | Delphi Developer - Argentina
- Maintained and improved Delphi-based ERP software, ensuring optimal performance and delivering tailored solutions for small and medium-sized clients.

EDUCATION

CENT35 (2004–2007)
Technical Degree in Systems Analysis
UTN - National Technology University (2007–2008)
Technical Degree in Programming

SKILLS

Programming Languages
- C#
- PHP
- Node.js
- TypeScript
- Python

Languages
- Spanish: Native
- English: Professional
- Danish: Intermediate
